

MCI Project Weekly Time Sheet

Team 19		Student ID a1809187		Week starting: 11			
Day	Date	Time In	Time Out	Total hours	Task	How does it fit into project plan?	Outcome/Next action
Monday	2022/5/23	10:00 AM	5:00 PM	7	Complete the function of setting different colors for nodes according to their type or other attributes. Record the video for testing static graph, search function and color function.	Testing is helpful to find bugs, and color function is one of the requirements.	Complete the color function recorded the video for testing.
Tuesday	2022/5/24	4:00 PM	7:00 PM	3	First group meeting discussing the progress of the team. Complete the testing plan. Try to improve the search function because there is some bugs found about this function after the testing.	Testing plan is due today and we have a lot to improve. And bug fixing is a big part in software engineering.	Testing plan completed. Perfected the search function for showing the first level connections.
Wednesday	2022/5/25	11:00 AM	6:00 PM	7	Try to achieve the all-level relationship between nodes when searching the node. And try to show the relationship in another way in order to improve the efficiency.	The search function is one of the most important function for the data flow map since there is no way users could find useful information in a graph that has many nodes without searching function. And since I have achieved the first-level, I want to try to achieve all-level relationship.	It is difficult to achieve the all-level relationship between nodes when searching the node in the original way. But I found another way to show it.
Thursday	2022/5/26	2:00 PM	5:00 PM	3	Achieve the exact matching instead of fuzzy matching since the fuzzy matching can be confused sometimes. Start working on the upload file function.	After discussing with the client, I realised that it is better to Achieve the exact matching instead of fuzzy matching since the fuzzy matching can be confused sometimes.	Exact match completed. Try to find some ways to achieve the upload function.
Friday	2022/5/27	5:00 PM	7:00 PM	2	Second general group meeting discuss the current progress of every team member's work. Continue to work on the upload file function.	It is important for users to have a place to upload their own dataset because it is impossible for users to copy their file into the code folder when they want to see their own data.	Upload file function for data flow map page completed.
Saturday	2022/5/28	12:00 PM	3:00 PM	3	Record video for showing the features that we have completed so far. Help to complete the meeting minutes. Check if other team members need my help.	It is important to receive feedback from the client especially its near the end of the project.	Video recorded.
