

MCI Project Weekly Time Sheet

Team 19		Student ID a1809187		Week starting: 10			
Day	Date	Time In	Time Out	Total hours	Task	How does it fit into project plan?	Outcome/Next action
Monday	2022/5/16	10:00 AM	5:00 PM	7	Start working on the testing plan, and improve the showing detailed information function to show the number of edges that links to the node.	Testing is important for a software project and showing the extra information for the node is required by the client.	Finished some part of the testing plan and assigned tasks to each team member.
Tuesday	2022/5/17	10:00 AM	3:00 PM	5	Complete the function of showing the number of edges that links to the node. Start working on the search function to show the searched node and nodes that links to it.	The search function is one of the most important function for the data flow map since there is no way users could find useful information in a graph that has many nodes without searching function.	the function of showing the number of edges that links to the node is completed.
Wednesday	2022/5/18	12:00 PM	5:00 PM	5	Complete the search function to show the searched node and nodes that links to it.	The search function is one of the most important function for the data flow map since there is no way users could find useful information in a graph that has many nodes without searching function.	Search function completed.
Thursday	2022/5/19	2:00 PM	5:00 PM	3	Attend the meeting after the workshop to discuss the progress of the project.Help to record the video for testing the data flow map search function as required by the client.	It is important to report the progress regularly and also test the function is working or not.	same as task.
Friday	2022/5/20	5:00 PM	10:00 PM	5	Complete the function of sizing nodes according to the number of edges link to the node. Make the list of tasks left.	After disscussing with the client, we realised that there are still a lot of tasks left to do. So it is important to assign tasks to each members	List and sizing function completed.
Saturday	2022/5/21	12:00 PM	5:00 PM	5	Improve the search function based on the feedback given by the client.	The search function is one of the most important function for the data flow map since there is no way users could find useful information in a graph that has many nodes without searching function.	Continue improving.
