

The seventh MCI group Project client meeting time and place will be decided by client.

Agenda

Chair: Jing Han

Secretary: Mingen Xiao

1 Apologies

None.

2 Presentation

None.

2.1 Functional requirements and Presentations in Last Meeting

Zhaotong Cui and Yufeng Jiang mainly focused on completing extract the case and join statements, showed their latest achievements to the client.

With the project progressing, team members had a deeper understanding of the project, Milestone Report draft turned to be out of data, need to make a significant modify. Mingen Xiao and Jing Han mainly focused on it, other members also gave their suggestion on it. Mingen Xiao mainly focus on modifying the previous minutes, in order to reflect the project processes in each week, Jing Han worked with him.

2.2 Problems and solutions

Last week we faced a problem, identifying the case statement from different identifier or identifierlist. This week we find the solution, that is traversing the identifier and identifierlist given by sqlparse, find one starting with a case. Then extract the case and join statements. But there were several tests cannot pass.

Hardly completing all the requirements for the project.

Solution:

- Modifying the conditions for extracting the case and join statements.
- All the team members should speed up, spare more time on the coding part instead of the daily paper work of the project.
- Never stuck on one point for long time, discuss more frequently.
- Ask questions in Slack directory.

3 Requirements Elicitation

3.1 We should modify some boarder conditions for the method of extracting the case and join statements, since there were some tests cannot pass yet.

3.2 As for the front-end, we need to compile a function, make a button, when the user clicks on it, the information of note, including column and type, can be display.

4 Other Issues

- Should some of the activities that has not been finished in milestone 1 be moved to the second milestone even if it may cause changes of project plan?
- Whether the project processing part of the milestone 1 report needs to contain reasons to cause the possible changes?

Note: Next MCI group Project client meeting time and place is left to client to decide.
