

The eleventh MCI group Project client meeting time and place will be decided by client.

Agenda

Chair: Jing Han

Secretary: Mingen Xiao

1 Apologies

None.

2 Presentation

None.

2.1 Functional requirements and Presentations in Last Meeting

Last week, the team was asked to achieve the following requirements:

- Set colours of the objects according to the type of the object.
- Display detailed information while hovering over the node.
- Interface for users which allow them to upload the input csv file directly in the webpage.
- Display All-level relationship on the data flow map.
- Set the checkbox to select the object instead of applying searching text bar.
- Create pages for showing case statement, subquery statement and connect different pages with a navigation bar in the webpage.

The team discussed how to make the test plan with the client at last the meeting.

2.2 Problems and solutions

For the difficulty in implement the data flow map showing all- level relationship of the objects, the team decide to use recursion to solve it, but the time complexity increased sharply. The client needs the function running the result within 15 seconds, so he decided to ignore this feature instead of show the first level relationship.

The project has already in the last stage, the team successfully achieved all the functions as planned. Next, we should deploy the webpage make it become a user accessible website. AWS has a free Cloud, the team decided to deploy the website on it.

3 Requirements Elicitation

- 3.1 Fixed the Github and write README.txt in it.
- 3.2 Complete the project management document on the Github.
- 3.3 Prepare for personal final report.

4 Other Issues

- 4.1 Question for poster.
- 4.2 Questions for final presentation.
- 4.3 Questions for demo.

Note: This is the last MCI group Project client meeting.
